

Briefing with CCT re. Convoy Feb 8, 2022.

1. First 24 hours- what do they need to sustain their frontline patrol and POU approach
2. What are the additional resources that they're seeking for their planned operations.
3. What are the resources required for their longer term investigative plan. May need to offer a Major Case Manager (Deputy Cox).

Once identified who the key stakeholders are (those with POU, ongoing or planned demonstrations and a real brief every 24 hour – bring those Chiefs together- here is what we're focused on- here is what we know. Cut out the peripheral players from the call unless they have affected jurisdiction. Facing loss of confidence of Chief Command within OPS.

Ministry working with MTO to have heavy tows arranged- on standby.

Need hubs around the province- Ottawa being the main one. Know what POUs are on duty- be stood up and ready to go around the province- which means we may need POU on duty and ready to go. We know it is coming- how do we get ahead of it.

Abrams: OPS- emergency ops resigned from position yesterday- there is no operational plan. Identified Incident Commander on Tuesday Supt Mark Patterson. 60 people called in sick yesterday.

McDonnell: Planning Team: Brad Taylor enr to assist as Planner. Insp Tim Skinner on his way to assist with planning team who is also POU Commander and CIC (YRP). Supt Phil Lue also coming from RCMP (BC) who will be tremendous asset. TPS, RCMP, WRPS, YRP. Insp Mike Francis will attend.

Commissioner- will need the process with OPS to be established. Where is the plan- can't do anything until we either have it or assist with building it. How are you going to use the resources that you've asked for. Have a SMEAC for the next 24 hours at very least.

There is no leverage for PLT to work with- ie- no injunction order; no heavy tows on standby etc; no strategic direction and loop back –

Not seeing travelers from US coming in to participate in the convoy.

Advice was given last week that *before you get an injunction- ensure you have your enforcement team in place.*

MTO Piece- DSG reaching across to DM of MTO. We will also push from our end. Get plan set up for hubs across the province- so initial rapid response is ready to go province wide (ie. should have been ready for Windsor ahead of blockage happening).

OPS engaged with 2 local Crowns- direction provided by OPS to arrest for those bringing in the fuel supply for aiding and abetting for public mischief. Legal opinion (Supt Abrams has it) to be forwarded to Chief Pardy. Vince Paris- Ottawa Legal- Also engage Chris Diana

Standing up provincial scheduling.

Need MCIC under Carson to assist.

Deputy Cox to get MCM name to share to EOC

Staffing Deployment Model- Big 12 are prepared to participate. TPS believes they can pull 100 at a time.

Chief Soly advised they have room at their command post – initial point of contact is Insp Debbie Palmer [REDACTED]

Set up a schedule for 30 days out so not scrambling week to week to make arrangements.

Arrange for another POU section- mobilize them and get them down to Central Region so they could be deployed to where they are needed (central location).

If we need ERT somewhere- have Pilatus availability.

WR have a large Search and Recovery group- may want to have discussions with them re their availability so not pulling ERT out of POU element (DiMarco to follow up).
